SUMMARY

Passionate about web development, I'm transitioning from a successful six-year career in banking with Citi to pursue my enthusiasm for coding. With a strong foundation built through extensive certifications and hands-on projects, I am familiar with JavaScript and am actively enhancing my expertise in responsive design and React as well. My analytical mindset and customer-focused approach enables me to create impactful solutions that enhance user experience. I am eager to contribute to technology-driven initiatives and leverage my skills in a dynamic environment that values continuous learning and innovation.

STRENGTHS

CUSTOMER RELATIONSHIP MANAGEMENT

Experience in managing customer relationships in banking involves listening to client needs, addressing concerns, and providing effective solutions. I'm looking forward to interacting with users or clients to understand their requirements, troubleshoot issues, and ensure their satisfaction with the technical solutions provided.

ATTENTION TO DETAILS

In banking, precision is key when handling transactions, verifying account information, and ensuring compliance with financial regulations. This meticulous attention to detail ensures that errors are minimized and processes are accurate. I feel in IT, this skill is essential for coding, where small mistakes can lead to significant issues. It also helps in debugging, where spotting subtle errors can resolve major technical problems.

RISK MANAGEMENT

I used to assess financial risks and implement strategies to mitigate them on a daily basis. I believe my experience is beneficial in IT, particularly in areas like cybersecurity, where identifying potential threats and vulnerabilities is crucial. My background in risk management helps me to foresee and address risks associated with software development, system security, and data handling.

EDUCATION

JUNIOR WEB DEVELOPER

SheCodes - Online
2024

METEO WORKSHOP

SheCodes | Online | 2024

The project displays Real-Time Updates, Detailed Forecasts, and an Intuitive User Interface.

It highlights:

- How to integrate a live API to fetch live data
- How to use Git and GitHub to manage code
- Advanced JavaScript techniques (ES6) to build interactive applications

AI WORKSHOP

SheCodes | Online | 2024

My first interactive web application using artificial intelligence feature an app that generate pizza recipe tailored to the user requests.

It highlights:

- How to write prompts and give instructions to AI tools like ChatGPT
- How to integrate an AI API into my code
- How to build an interactive text generator with AI
- How to integrate CSS in JavaScript

INTERACTIVE PORTFOLIO WITH RESPONSIVE DESIGN WORKSHOP

SheCodes | Online | 2024

The project showcase part of my web development journey with a focus on responsive design.

It highlights:

- Multiple HTML pages with complex linking to highlight various projects and skills
- Leveraged CSS variables to streamline the styling process and maintain a uniform look across the portfolio
- Advanced Flexbox layouts to ensure the portfolio is responsive and visually consistent on all devices

WOMEN CODING LANDING PAGE WORKSHOP

SheCodes | Online | 2024

Developed an engaging landing page designed to showcase and link to various external resources.

It highlights:

- Pure CSS Grids to create a clean and organized layout
- Responsive CSS Grids to ensure the landing page is accessible and visually appealing across all devices, showcasing skills in responsive design
- CSS Filters to enhance visual elements with dynamic effects, adding a modern touch and demonstrating advanced styling techniques
- Integrated HTML Embeds to incorporate external content and multimedia, reflecting versatility in embedding diverse types of data seamlessly
